

Driver Download

Please open **Internet Explorer** and go to www.hp.com on the hp website please select **Software & Driver Downloads**

Please enter in **Laserjet 4350N** in the space available. In the next window select the operating system that your computer is running. Another page will appear where you select the first driver in the list under the driver heading.

Select **Download** chose **Run** when asked and **Unzip** when asked to do so.

Vista users

Please Download the Driver First

Click **Start** and open the **Control Panel**

Under the Control Panel select the **Hardware and Sound** Icon

Under the Printers heading select **Add a Printer**

A new window will open. Click on the **Add a local printer**.
Click **Next**.

Select **Create a new port** and chose **Standard TCP/IP Port** in the drop down box.

Click **Next**.

You will be asked to enter an
Printer name or an IP address enter an IP from the chart below.
Then click **Next**

Dorm	IP Address
Tuve	10.1.10.115
East	10.1.10.117
Stavig	10.1.10.114
Granskou	10.1.10.116
