Subject: Re: 2c Faculty Development Grant project and report

Arlen,

Our 2c project relates to goal 4: In what ways have we enhanced assessment of student learning? How can we apply that to the curriculum?

There is an assessment component for each of the information literacy activities we've incorporated into BSAD320. All the students filled out an information literacy survey the first day of class. They will fill out the same survey at the end of the semester. Those results, along with the assessment components for each of the information literacy activities should give us a pretty clear picture of whether or not we were successful in helping students acquire information literacy skills.

If you need additional information relating to our 2c grant, please let me know. We are in the midst of implementation. Since the semester ends after Nov. 30, we will submit an interim report with our final report after the end of first semester.

Kay
