TEACHER EDUCATION
AUGUSTANA
UNIVERSITY

WHY MAJOR IN EDUCATION?

The Teacher Education Program at Augustana offers professional preparation programs for careers in the areas of elementary education, secondary education, all-grades education, special education, sign language interpreting and pre-professional preparation in communication disorders. All programs leading to initial level certification are approved by the South Dakota Department of Education (SD DOE). On this journey, Augustana University knows you want an education that is relevant, so we take a practical approach — you hit the ground running by mentoring students your first year. This practical experience in secondary schools continues throughout your program and, if you choose, may include schools around the world. When exploring your future, discover why Augustana is secondary to none.
